Summary

Full Stack Engineer specializing in Python (Django, FastAPI) and modern JavaScript ecosystems (React, Angular). Skilled in designing robust RESTful APIs, handling asynchronous task processing with Celery, and containerizing applications with Docker.

Skills

- **Programming Languages:** Python, JavaScript, SQL
- **Backend Frameworks:** FastAPI, Django, Django REST Framework, Celery
- **Frontend & Mobile:** React, React Native, Vue.js, Angular, Tailwind CSS
- **Databases:** PostgreSQL, Redis, MongoDB, SQLite
- **Infrastructure & Tools:** Docker, Linux, Git, Jira, Trello

Education

BS	National Aerospace University "Kharkiv Aviation Institute"	Sept 2022 – May 2026
	Software engineering	
	• Coursework Highlights: Computer Architecture, Comparison of Learning Algorithms, Computational Theory; • Diploma Highlights: Mobile application development, budget estimation and planning, architecture design, layout creation	

Experience

Hackathon Project , Real-Time Java Analytics Dashboard	Sep 2022 – Oct 2022
• Built simple social media analytics dashboard using Java and Spring Boot with REST APIs for data aggregation • Designed responsive frontend with HTML/CSS to visualize engagement metrics and user trends	
University Project , Data Visualization Dashboard (Python)	Oct 2023 – Dec 2023
• Completed a Python-based dashboard project using Flask and Plotly, integrating real-time data visualization with filters. • Demonstrated data presentation skills and backend integration proficiency.	
Python Developer at :Dteam	Jun 2025 – Present
• Successfully completed a series of large-scale projects, including: – E-commerce platform with Liqpay, Checkbox, and other payment system integrations – Legacy website support; – Development from scratch, as well as migration of a legacy website to a more modern set of technologies; – Telegram bots with ChatGPT API integration • Debugged and resolved production payment system issues, ensuring 99.9%+ up-time for critical transactions • Participated in daily/weekly code reviews with senior developers	

Projects

FastAPI CRM — High-Performance Sales Pipeline

FastAPI CRM [🔗](#) (Featured)

- Built production-ready CRM with FastAPI, SQLAlchemy 2.0 async ORM, and PostgreSQL. Features JWT authentication, multi-environment Docker setup, and 90%+ test coverage with Pytest
- Implemented advanced filtering, pagination, and structured JSON logging for observability. Configured GitHub Actions CI/CD for automated testing and security checks
- Tech Stack: FastAPI, SQLAlchemy 2.0, PostgreSQL, Alembic, Docker Compose, Pytest, GitHub Actions

Recipe Platform — Full-Stack Django + React Application

Recipe Showcase Platform [🔗](#) (Featured)

- Developed full-stack recipe sharing platform with Django REST, React 18, and PostgreSQL. Integrated Celery + Redis for async image processing and caching
- Implemented full-text search, ratings, bookmarks, and SEO optimization with schema.org markup. Containerized with Docker, Nginx, and Gunicorn for production deployment
- Tech Stack: Django 5.0, React 18, PostgreSQL, Redis, Celery, Docker, Tailwind CSS

MERN Social Network — Full-Stack Social Media Platform

MERN Social Network [🔗](#)

- Built scalable social network with MongoDB, Express, React, Node.js. Implements user authentication, friend connections, posts, likes, and real-time notifications
- Tech Stack: MongoDB, Express, React, Node.js, JWT Authentication

Event Management System — Django Web Application

Event Management System [🔗](#)

- Built event management system with Django, SQLite, and Tailwind CSS. Features event creation, CRUD operations, and responsive UI design
- Tech Stack: Django, SQLite, Tailwind CSS, JavaScript

Languages

- **Ukrainian & Russian:** Native speaker;
- **English:** Full Professional Proficiency;
- **German:** Elementary Proficiency (A1/A2)
